## Agricultural Product R&D Pipeline: Early Assays through Market Launch

**We offer these services as a customized approach tailored to your goals, strategy, discovery platform, and pipeline.**

Many common assays (e.g. stability, bioavailability) allow for efficient outplacement.

This approach is amenable to new pest control products including:

- **Chemistries:** novel, post-patent, and mixtures
- **Biologicals:** extracts, bio-molecules, and active strains
- **Biostimulants:** macromolecules, soil enhancements, and strains

**Global Agricultural Development Corporation can offer these services through our own partnerships with labs, field test sites, consultants, and industry experts.**
