

## NAICC GLP Training for Research and Quality Assurance Professionals

Tuesday, January 24, 2023

8:00 am – 12:00 pm

(Registration and Continental Breakfast at 7:30 am)

Cost \$125

---

The NAICC GLP Education Outreach Committee is offering three GLP workshops that will get you into high gear for the next season. These workshops receive high reviews each year and many return the following year to attend a different one.

*“I was looking for content out of my realm being from the field level and it met my expectations. Very helpful. Helps to improve my training of employees”*

*“Challenges and hands on situations were very well prepared and useful”*

Each workshop is interactive and a great way to connect with others in the GLP field whether they are a researcher, QA personnel, or study director. You will walk away from any of the workshops with a greater understanding of Good Laboratory Practices.

**Basic GLP Training: Limited to 100 participants.** This session is aimed at those with 0-2 years GLP experience. It provides a basic overview of the GLP regulations with emphasis on the responsibilities of QA, Study Directors and Principal Investigators as it relates to your role in a GLP environment. The session is designed to be interactive and will provide you the opportunity to hear how others interpret the regulations and how to best apply them to your job function.

**Refresher GLP Training: Limited to 60 participants.** This course will refresh and challenge your GLP knowledge and has something for everyone. You will be encouraged to think outside the box when interpreting the GLPs. Material will cover topics relevant to field, lab, and sponsor GLP personnel, utilizing real-life scenarios and group discussion. We will also focus on a particular GLP area/topic for deeper understanding. GLP experts/consultants will be present to moderate and answer questions.

**Practical Field Workshop Harvesting: Limited to 25 participants.** This hands-on workshop will focus on application techniques, equipment, data documentation, and GLP compliance. This session is designed to provide practical information on overall trial conduct, GLP compliance issues, industry best practices, and efficiency in capturing raw data for field research personnel and QA professionals conducting/auditing GLP studies.
